Targeting challenging opportunities in Software Development to leverage broad programming exposure and excellent analytical skills as an entry-level Software Engineer with an organization of high repute to further career growth.

CORE COMPETENCIES

- Software Development Lifecycle
- User Experience Design
- Project Management
- Agile Methodologies
- System Integration
- Customer Relationship Management
- Performance Optimization
- Risk Management

AREAS OF KNOWLEDGE

- Micro service Development
- Data Structures & Algorithms
- Object-Oriented Programming,
- Database Management System
- Cloud Computing
- Data & QA Analysis

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, TypeScript
Version Control: Git
Frameworks & Libraries: Django, Express.js, React.js, Next.js,Node.js
Scripting and Design: HTML, CSS, Tailwind Css
Database: MySQL, MongoDB
Cloud & Server: AWS, Apache
Tools: Selenium, Power BI, Jenkins

SOFT SKILLS

Change Agent |Collaborator | Innovator
Communicator | Planner | Thinker

INTERNSHIP

Production Intern
Guttermann India Pvt. Ltd.
Aug'17-Oct '17

PROFILE SUMMARY

- I am a detail-oriented professional with overall **5 years** of work experience with **more than 1 year in software development**, specializing in developing back-end and front-end applications, Micro-services, Data Structures, Algorithms and Cloud Computing.
- Proven expertise in creating and integrating APIs using Python, Django, Node.js, and Express.js, as well as developing dynamic front-end applications with React.js and JavaScript.
- Proficient in a range of technologies, including JavaScript, HTML, CSS, MySQL, MongoDB, AWS, and Apache, with a solid understanding of software design and architecture principles.
- Recognized for enhancing team performance through mentorship and fostering a collaborative environment, while driving operational efficiency and optimizing workflows.
- Proficient in enhancing database performance and fortifying data integrity, ensuring robust security measures and streamlined operations.

WORK EXPERIENCE

Jagapati Engineers Pvt. Ltd. **Jun'20 - May'24**

Growth Path:

Software Engineer **Jan'23 - May'24**

Responsibilities:

- Led the design, development, and deployment of Restful APIs utilizing Python and Node, React, ensuring optimal performance and security for data transactions.
- Managed the complete software development lifecycle (SDLC), including Front-end and back-end coding with database integration, debugging, and deployment of features to production environments.
- Collaborated with cross-functional Agile teams, participating in daily stand-ups, sprint planning, and retrospectives to ensure alignment with project goals and timelines.
- Implemented industry best practices for coding standards, version control (Git), and (CI/CD) pipelines to enhance code quality and scalability.
- Conducted thorough code reviews, employing static analysis tools and unit testing frameworks to maintain high code standards and facilitate knowledge sharing within the team.

Highlights:

- Achieved a significant reduction in API response time by optimizing database queries and implementing caching mechanisms, leading to a more responsive user experience.
- Successfully led a cross-functional team through the integration of a new Customer Relationship Management (CRM) system, enhancing customer satisfaction and improving data accessibility through a unified interface.

EDUCATION

- **B.Tech. (Mechanical & Engineering)**
  Kurukshetra University
  Aggregate: 9/10
  2018
- **12th**
  Scholars Abode School (CBSE)
  Aggregate: 85.4/100
  2013
- **10th**
  New Delhi Public School (CBSE)
  Aggregate: 9.2/10
  2011

CERTIFICATIONS

- **MERN**
  Cuvette | Aug'24
- **Database**
  Udemy | Aug'23
- **PHP & MySQL**
  Udemy | Jul'23
- **Cloud Computing and AWS Fundamentals**
  Udemy | Jul'23
- **Python Developer Bootcamp**
  Udemy | Jul'23
- **Python**
  Hacker Rank | Jul'23
- **SQL**
  HackerRank | Jul'23
- **Data Management**
  TCS | May'23
- **Lean Six Sigma Green Belt**
  Udemy | Aug'20
- **AutoCAD**
  NSIC | Jun'16

PERSONAL DETAILS

GitHub: github.com/ruchi-singh0509

Languages Known: English and Hindi
Address: H. 23, 5th Main, Block B Vinayaka Nagar, Murgesh pallya, Bengaluru - 560017

- Identify and resolve critical bugs and performance bottlenecks within strict deadlines, resulting in an increase in overall team productivity and a smoother development workflow.

Methods Engineer **Jun'20 - Dec'22**
Responsibilities:

- Spearheaded the development and implementation of advanced methodologies for process optimization that led to a significant reduction in project delivery timelines, enhancing overall project throughout.
- Collaborated closely with cross-functional stakeholders to meticulously gather requirements and define comprehensive project scopes.
- Streamlined internal workflows through the application of Lean and Six Sigma principles, resulting in significant enhancements in operational efficiency and productivity.
- Mentored and guided junior engineers, fostering the development of their technical competencies and promoting a culture of knowledge sharing.
- Ensured strict adherence to industry standards, regulations, and quality assurance protocols throughout all engineering processes.

Highlights:

- Recognized for exemplary performance in process optimization, contributing to increased organizational effectiveness and resource utilization.
- Developed and instituted a sophisticated data analysis methodology that enhanced decision-making processes, resulting in more informed strategic planning and reduced project lead times.

Quality Engineer (Assurance & Control)
Bombardier Transportation Pvt. Ltd. **Feb'19 – Feb'20**

Responsibilities:

- Executed comprehensive quality assurance and quality control (QA/QC) inspections in rail manufacturing, effectively identifying and mitigating potential defects to enhance customer satisfaction and operational efficiency.
- Collaborated with cross-functional teams to investigate quality-related issues, utilizing root cause analysis methodologies to implement corrective and preventive actions.
- Spearheaded continuous improvement initiatives, leveraging Six Sigma principles, Kai-Zen to enhance product quality and manufacturing processes.
- Developed and presented detailed quality reports for management review, facilitating informed decision-making.

Highlights:

- Played a pivotal role in the successful execution of four major projects and actively participated in International Railway Industry Standard (IRIS) audits.

PROJECTS UNDERTAKEN

- **Restaurant Uptime Monitor (Django, Python, MySQL):** A back-end system that tracks online/offline status of US restaurants during business hours, providing uptime & downtime reports for owners.
- **Job Listing Platform (Express.js, React.js):** A web app for job seekers & employers with skill-based filtering, public link sharing, and easy job management.
- **Super App(React.js):** A Personalized movie recommendation app with user registration, genre selection, and integrated weather & news displays from APIs, a note section and a timer.
- **Manufacturing_Management_System (Python, React.js, MySQL, Redis):** A full Stack app tracks real time updates of inventory, quality control & supply-chain, employee login/logout, production scheduling and CRM system.
